ENVOME

— ALL THINGS ECO —

Envome believes in creating an ecosystem of sustainability. We wish to step in and influence change with our top of the line Eco products to meet the industries growing need to go green.

Our palm leaf crockery is not only 100% organic, but also completely biodegradable & compostable under natural conditions

Envome associates with special help groups and work with rural men and women farmers of Karnataka, southern India, providing them with sustainable, fair and long term job opportunities,

How are areca plates made?

The areca nut sheaths from the areca nut palm tree, falls on the ground, they are picked up, pressure washed, dried in the sun, and then heat pressed into the molds of the desired shapes to produce the areca plates. It is made without the use of any chemicals and is completely home compostable.
